

## EXCELLENT CUSTOMER SERVICE

We strive to provide excellent Customer Service. Any questions you may have about our product will be answered in a prompt and friendly manner. Technical questions will be answered by people with an understanding of the design of our system. Questions about the use of our system will be answered by people with knowledge of the Freight Forwarding industry.

This holds true whether you are a customer of ours, or are still a prospective buyer. We can be reached by phone or email.

# FreightEasy™

A Complete Freight Forwarding System Made Easy

## FREE TRIAL ACCOUNTS

Free trial accounts are available. Remember, FreightEasy™ is web-based, so there are no special hardware requirements and you don't have to wait on a software installation. The trial is a full version of our system with some placeholder data entered, so you will get a realistic feel. Any data you enter of your own will be erased at the end of the trial period, or transferred to your account if you decide to buy our system. Please contact us for your own unique user name and password.

## ABOUT E-LOGISTICS TECHNOLOGY

E-Logistics Technology was founded in 2002 by Freight Forwarders who thought the current offering of systems was not good enough, and that they could do better. They believed they could provide an all-in-one solution for Freight Forwarders that was both easy to implement and affordably priced. They wanted to achieve these goals while ensuring that the system would always be designed with the users in mind, Freight Forwarders. The end result was FreightEasy™.

E-Logistics Technology continues to expand on its vision with development of other modules that will add on to its Flagship product, FreightEasy. Warehouse management, CHB, and AMS modules are under development. E-Logistics Technology hopes to continue to reduce paperwork and repetitive tasks, while increasing communication, all with the goal of making life easier for our customers.

E-Logistics Technology is located in Burlingame, California.

## FREIGHTEASY™

- **Is a full featured, all-in-one solution for the Freight Forwarder.**
- **Has a logical interface designed by people who know Freight Forwarding.**
- **Is a true turnkey solution. There are no expensive server requirements. All that is required is a computer and an internet connection.**
- **The application and your data are accessible anytime of the day, from anywhere with an internet connection.**
- **Facilitates communication with customers, corporate partners, branch offices and government agencies.**
- **Offers data security. Our servers are maintained by Rackspace, one of the leaders in the industry.**
- **Is priced extremely competitively. We charge a low startup fee, and a reasonable monthly fee.**

## DESIGN OF THE SYSTEM

- **Very efficient navigation:** Moving around from task to task within the system is quick and easy.
- **Minimizes Employee Training:** Freight Forwarding tasks are easy to perform within the system. The workflow is intuitive even for those with minimal knowledge.
- **Easy External Communication:** Direct links to AES, one click email for Pre-Alerts and Shipping Notices and the ability to export documents to PDF and Excel formats.
- **Fully Integrated:** It has the tools to do any Freight Forwarding and Accounting task, as well as generate tracking reports; all without leaving the system.

1. SED screen for Air Export

## TECHNOLOGY

- **Web Native:** Our system was designed from the ground up using Microsoft's ASP.NET web development technologies.
- **No expensive hardware** required. Some systems require servers costing \$5,000 and more.
- **Convenience:** The application and your data are available to you anytime, from any computer with an internet connection.
- **Instant deployments** of updates are done by us, without the end user being affected.
- **ASP.NET** provides the tools for us to make a professional product. Speeds are very fast. Navigation and Features are much like Windows.
- **Proven technology:** Yahoo Mail, Microsoft Office Help, and PayPal, are all examples of ASP applications.
- **Data Security:** Your data is safe with multiple storage sites and redundant hardware and data connections.
